Summary

Motivated IT undergraduate with hands-on experience in full-stack software development using React.js, Node.js, Express.js, and MySQL with a strong focus on building secure RESTful APIs and scalable web applications. Experienced in implementing JWT authentication, role-based access control, and normalized database design through real-world projects. Familiar with Git-based workflows, Agile development practices, and AI-assisted development tools. Passionate about problem solving, backend system design, and continuously learning modern technologies to build efficient software solutions.

Education

BSc (Hons) in Information Technology - University of Kelaniya	<i>March 2024 – Present</i>
• GPA: 3.5/4.0	
Comprehensive Master Java Developer - IJSE-Institute of Software Engineering	<i>2024 – 2025</i>

Technical Skills

- **Programming Languages** : JavaScript, Go, Java, C++, Python
- **Backend Development** : Node.js, Express.js, REST API Development, JWT Authentication
- **Frontend Development** : React.js, HTML5, CSS3, Material UI
- **Database Technologies** : MySQL, MongoDB (Schema Design & Query Optimization)
- **Software Engineering Practices** : Object-Oriented Programming (OOP), Role-Based Access Control, Agile Development
- **Dev Tools** : Git, GitHub, Postman, Docker , Figma, Adobe XD, Sketch, Photoshop

Projects

AANYA Health Management System — Healthcare Management Platform	<i>January 2026 — Present</i>
• Technologies: React, TypeScript, Material UI, Node.js, Express.js, MySQL, React Query, Axios, JWT, Docker • Developed a full-stack healthcare management system to digitize patient records, appointments, prescriptions, lab operations, and pharmacy workflows. • Built responsive role-based dashboards for Admin, Doctor, Patient, Receptionist, Pharmacist, and Lab Technician using React, TypeScript, and Material UI. • Designed RESTful APIs using Node.js and Express with modular architecture for authentication, appointments, prescriptions, lab, and notification services. • Implemented secure authentication and role-based access control using JWT and protected route guards. • Designed MySQL relational database schema supporting appointments, payments, lab workflows, inventory, and patient vitals. • Configured Docker Compose and database bootstrap scripts for containerized development and reproducible deployment.

CloudTask—Cloud-Native Microservices Task Management Platform

March 2026

- **Technologies:** Go (Fiber, GORM), React, TypeScript, PostgreSQL, Redis, Docker, Nginx, GitHub Actions, Render
- Built a cloud-native task management platform using microservices architecture with four independent Go services (Auth, Task, Team, Notification).
- Implemented real-time notifications using WebSockets and Redis Pub/Sub for live task updates.
- Designed secure JWT-based authentication and role-based access control.
- Configured Nginx API Gateway and containerized services using Docker Compose.
- Implemented CI/CD using GitHub Actions and Infrastructure as Code deployment using Render.

TrueGate Secure — User Authentication & Security Management System

Jul 2025

- **Technologies:** React, Material UI, Node.js, Express.js, MongoDB, JWT, DigitalOcean
- Developed responsive frontend using React and Material UI integrated with backend authentication APIs.
- Implemented JWT-based authentication and secure session management.
- Built RESTful authentication services using Node.js and Express.
- Integrated MongoDB for secure user and device data management.
- Deployed application on cloud-hosted infrastructure using DigitalOcean.

Certifications Online Courses

AWS Certified Cloud Practitioner (CLF-C02) Cert Prep | *LinkedIn Learning*

Designing User Interfaces and Experiences (UI/UX)| IBM | *Coursera*

Introduction to Artificial Intelligence | *LinkedIn Learning*

Node.js Essential Training | *LinkedIn Learning*

Achievements

Winner	- SDG Sprints Challenge 2026 (Organized by IEEE Sri Lanka Section SIGHT)
2nd Runners-Up	- Code with WIE Hackathon 2025 (Organized by IEEE Women in Engineering (WIE) Sri Lanka.)
Finalist	- Mobitel CodeBlast Hackathon Challenge 2025 (Organized by SLT-Mobitel & hSenid Mobile Solutions.)
Finalist	- JuniorHack 7.0 Pre-Hack Challenge
Finalist	- CYBERZEE'24 Inter-University Cybersecurity Quiz
Finalist	- NetCom 2024 Networking Competition

Extra-Curricular Activities

Rotaract Club - University of Kelaniya

Served as External Relations (ER) Coordinator for the Kelani Hendeewa 2025 community service project. Supported external communication efforts and event promotion while working closely with the team. Developed leadership, communication, teamwork, and coordination skills.

IEEE Volunteer - University of Kelaniya
