Please describe your relevant skills, experiences, and motivations that align with the role.

*We would like to get to know you better through your own words. We encourage you to compose at least 4 sentences in English. Please refrain from using AI to complete this section. ** 

I am currently pursuing a degree in Information Technology at University of Kelaniya, and I have a strong interest in software development. A real-world health center management system is one of the full stack projects I've been working on with React, Node.js, and MySQL. I developed my skills in clean architecture, database design, authentication, and API development through these projects.

I've also taken part in a number of hackathons and competitions, where I learned a lot about working in groups and resolving practical issues. I was a hackathon winner, which motivated me further to improve my technical and problem solving skills.

I am excited about this internship because it will allow me to improve my software engineering skills while working in a professional environment. I am highly motivated to learn, contribute to real products, and build my career as a software engineer. I am confident that this opportunity at
